

**DEHUMIDIFIED SMALL DYNAMIC CABINET FOR STORAGE OF COILS, SMT AND PTH STICKS AND OTHER MATERIALS.**

#### DYNAMIC MANAGEMENT

The components do not have a fixed and determined position, but can be loaded at any free space available. In this way there is a dynamic management of positions and the store always reaches its maximum capacity, without waste of space.

[FIND OUT MORE](#)

### No human mistakes

Reduction of the possibility of operator's mistakes in the picking of the components, thanks to the elimination of paper, and the use of automated systems or alarms.

### Traceability

Total control of the materials in the store and in the production line. Thanks to the ISM software, it is possible to integrate the stores to the production lines in order to know the exact quantity used for each component.

### ROI

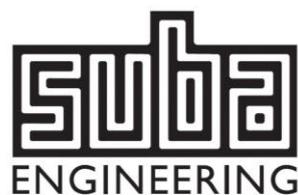

It quickly recovers your investment thanks to the significant reduction of costs related to the material handling and to setup preparation time. Moreover, you benefit from the increasing productivity of the pick and place lines
